January 19, 2018: Week 19

What a crazy week! With MLK Day on Monday, and Inclement weather on Wednesday, this week just flew by. I hope everyone stayed safe and warm 😊

Next week students will finish up the unit on Minerals with a Mineral Identification Lab, and then we will be moving onto Rocks and the Rock Cycle. Students will learn the differences between Sedimentary, Metamorphic, and Igneous rocks and compare the processes that need to occur in order to produce these rocks.

Next Week in Science:

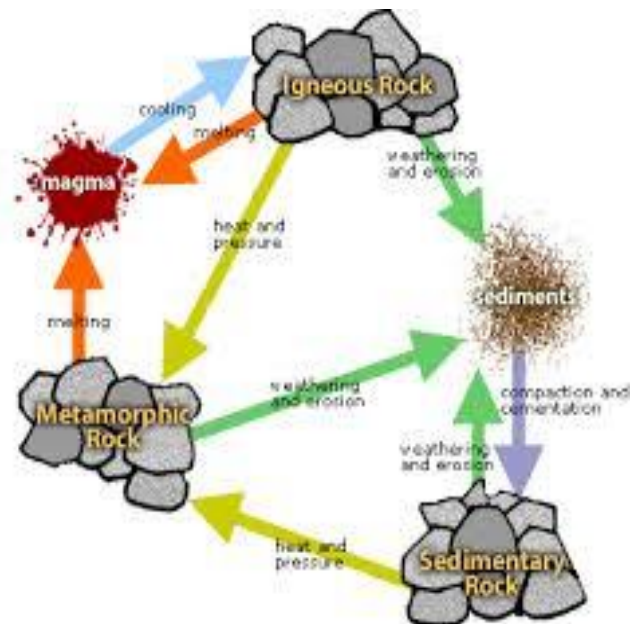

Monday: Mineral Identification Lab

Tuesday: The 3 Types of Rocks

Wednesday: Types of Rocks Reading

Thursday: Rock Identification Lab

Friday: COMPUTER LAB

VOCABULARY:

Igneous Sedimentary

Metamorphic Rock Cycle

Weathering Eroding

Deposition
