

SCIENCE

November 3, 2017: Week 11

This week in science, students learned about the Law of Conservation of Energy. Students learned that energy is neither created nor destroyed, but it is being changed into a different form. We observed and identified energy transformations in various objects on Wednesday and on Thursday we built Rube Goldberg Machines!

Next week we will finish up our unit on Energy Transformations with a TEST on Wednesday!

New pictures on my website! 😊

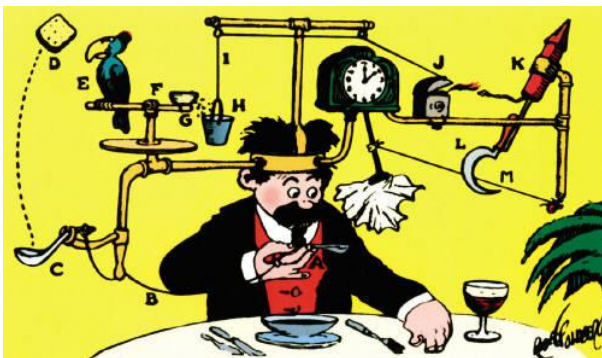

VOCABULARY TERMS:

Energy Force Gravity Friction

Potential Energy Kinetic Energy

The Law of Conservation of Energy

Transformations

Next Week in Science:

Monday: Energy Transformation Practice

Tuesday: Energy TEST Review

Wednesday: Energy TEST

Thursday: Energy Reading

Friday: COMPUTER LAB
