

# Science

**February 16, 2018: Week 23**

This week in science, students researched a geological event of their choice. Students researched how the geological event happens in relation to plate boundary movement. Students also worked on their review for a TEST next MONDAY.

Next week we will be continuing to discuss and learn about different geological events.

## Next Week in Science:

**Monday:** EARTH TEST

**Tuesday:** Volcanoes

**Wednesday:** Earthquakes

**Thursday:** Milky Way LAB

**Friday:** COMPUTER LAB

## VOCABULARY:

Asthenosphere Transform

Convection Current Divergent

Lithosphere Convergent
