

## February 9, 2018: Week 22

This week, students learned about how the Earth is broken up into what is called tectonic plates. Students were able to identify the 6 major plates as well as several smaller plates located on the lithosphere.

Next week we will begin a mini research project where students will be researching geological events caused by plate movements.

### Next Week in Science:

- Monday:** Tectonic Plate Chapter Reading
- Tuesday:** Research Poster
- Wednesday:** Research Poster
- Thursday:** Review
- Friday:** COMPUTER LAB

### VOCABULARY:

Asthenosphere Transform  
Convection Current Divergent  
Lithosphere Convergent
