April 13, 2018: Week 29

This week in science, students continued to learn about characteristics that are used to classify organisms. Students also learned about the microscope and microscope parts.

Next week in science we will dive right in and use microscopes to view a variety of organisms and hopefully even see live microscopic organisms in pond water!

- Next Week in Science:**
- Monday:** Microscope Station Lab
 - Tuesday:** Pond Water Lab
 - Wednesday:** Classification of Organisms
 - Thursday:** Classification of Organisms
 - Friday:** COMPUTER LAB

VOCABULARY:

- Unicellular Multicellular
- Prokaryotic Eukaryotic
- Autotroph Heterotroph
- Sexual vs Asexual reproduction
