

Science

May 4, 2018: Week 32

This week in science, students learned about ecosystems and the levels of organization in an ecosystem! Students also began a research project on their ecosystem of choice!

Next week, students will continue to research information on their ecosystem. Towards the middle of the week, they will begin putting their ecosystem poster together!

- What ecosystem are you researching?
- Where is your ecosystem located?
- What kind of animals live in your ecosystem?
 - Give at least 4 examples and **at least** 1 fact for each animal.
- What kind of plants live in this ecosystem?
 - Give at least 4 examples and **at least** 1 fact for each plant.
- Tell me about the climate in your ecosystem
 - How does it effect the animals/plants in your ecosystem?
- 5 items that you should bring along if someone were to visit your ecosystem. Ex: appropriate clothes, shoes, supplies, etc.
- 3 fun facts about your ecosystem

Next Week in Science:

- Monday:** Ecosystem Research
- Tuesday:** Ecosystem Research
- Wednesday:** Ecosystem Research
- Thursday:** Ecosystem Research
- Friday:** Review for DCA

VOCABULARY:

Ecosystem Organism
 Population Community
 Biotic Abiotic
